NetBeans **|** MySQL **|** Visual

PROJECTS

May 2019

Copy-proof QR Code (Product Security label)
Ongoing project

- The aim of the project is to fight against counterfeiting of luxurious goods, cosmetics and nutrition supplement products.
- Project is currently in the development phase and the project focuses mainly on Print-Camera Robust Digital Watermarking method (image processing concept).
- The future expansion of the project focuses on Blockchain Architecture Development to provide brand protection and supply chain tracking services to clients.

January 2019

Real Estate Web Application
Guide: Prof. Sheetal S. Shah

- This project is inspired from the website Rentberry, a long-term rental platform based on blockchain
- WordPress Web application, a platform to connect buyers and sellers of real estate properties
- We used MySQL database to develop the application

February 2019

Library Management Web Service
Guide: Prof. Ankit P. Vaishnav

- CRUD Operation based library management service

May 2018

Crowdfunding Rental Deposits Platform (Ethereum Blockchain)

- It is estimated that there is more than $500 billion locked in rental deposits worldwide.

- Our platform will allow quality tenants to unlock most of the money they would have to tie up in their rental deposits by utilizing a crowdsourced rental deposit network – a community of users on our platform, such as friends, family members, landlords, tenants – who will finance part of the required rental deposit.

Studio **|** Remix Ethereum IDE
Familiar with: ReactJS

July 2018 – October 2018

Real Estate Angular Website
Guide: Prof. Prashant M. Jadhav

- I built this website on Angular framework and MongoDB as a backend framework

July 2018 – October 2018

Online Shopping MVC Application
Guide: Prof. Jatayu Baxi

- We built Online Nursery Shopping application based on ASP .NET MVC

January 2018

Online Banking Django Application
Guide: Prof. Jigar M. Pandya

- I developed a Django Application to make online transactions and keep track of transaction history
- I used MySQL database as a backend of this application
